

# Rene Requiastas

Senior Principal Backend Engineer | AI Solutions Architect | 20+ Years Expertise

Singapore

## Summary

Accomplished Senior Backend Engineer with over two decades of experience designing and scaling high-performance distributed systems. Expertise spans the full software development lifecycle, with a deep focus on Java and Python ecosystems. Proven track record in migrating legacy infrastructures to AWS, optimizing relational database performance, and building resilient architectures for global financial institutions and government agencies. Currently specializing in Generative AI implementation and AI-driven process automation.

## Experience

### Principal Backend Engineer / AI Consultant

Nexus AI Solutions (Self-Employed)

Jan 2025 – Present

Leading the development of agentic AI frameworks and RAG architectures for small-to-medium enterprises. Leveraging Python and AWS Bedrock to automate complex business workflows.

### Senior Backend Architect

Global Fintech Systems

Mar 2018 – Dec 2024

Architected high-throughput trading data pipelines using Java and Spring Boot. Managed large-scale migrations from on-premise Oracle databases to AWS RDS PostgreSQL, achieving a 30% reduction in latency. Implemented comprehensive observability using Datadog and Splunk.

### Technical Consultant

Infocomm Development Authority (GovTech)

Jun 2012 – Feb 2018

Oversaw project planning and technical documentation for national-level digital initiatives. Developed robust backend services using Python and Django, ensuring high availability and security compliance.

### Senior Software Engineer

Citigroup (Contract via Global Tech Services)

Jan 2008 – May 2012

Developed a global HR tool for tracking time and attendance across international regions. Optimized complex SQL queries for Oracle RDS to handle millions of records daily.

**Software Engineer**

Enterprise Software Solutions

Jun 2004 – Dec 2007

Core contributor to enterprise resource planning (ERP) systems. Built modular Java-based middleware and integrated third-party APIs.
